

# Daniers Alexander Solarte Limas

Software Engineer | Backend & Frontend Developer

## • Professional Profile

I believe that technology should go beyond solving problems — it should transform lives.

I specialize in **backend development** with **Node.js, Spring Boot, Python, and Java**, and I also enjoy the challenges of **frontend development** using **React, Angular, Next.js, and Tailwind CSS**.

I'm passionate about building **secure, scalable, and intuitive applications**.

I'm inspired by **cybersecurity, artificial intelligence**, and **mixed reality**, because they connect the digital with the human.

I invite you to explore my portfolio and discover how each project reflects my passion, my learning, and my vision of the software world.

---

## • Technical Skills

### 1. Programming Languages:

Java · Python · C# · JavaScript · TypeScript

### 2. Frameworks & Technologies:

Spring Boot · Node.js · Django · Angular · React · Next.js · Tailwind CSS · Unity

### 3. Databases:

MySQL · PostgreSQL

#### 4. Tools & Others:

Git · GitHub · Visual Studio Code · Docker · Postman · Figma

#### 5. Professional Interests:

Cybersecurity · Artificial Intelligence · Mixed Reality

---

-  Academic Background

##### Software Engineering

*Universidad Cooperativa de Colombia – Campus Pasto*

 Currently studying 5th semester

- Relevant academic projects:

1.  **PlantSim** – Virtual plant growth simulator
  2.  **CaféMonitor** – Real-time coffee monitoring system
  3.  **Interface design and development** focused on usability and user experience
-
